PORTFOLIO

andmog.com

Hi,

For the past seven years, I have worked at AHMM on large-scale mixed-use office and residential projects, from Concept Design to Construction. Key completed schemes include 10 Lewis Cubitt Square, a landmark development in London's King's Cross masterplan and Tottenham Hale North Island, one of three major multi-storey residential projects in Haringey. Previously, I joined BDP Pattern to work on the Al Rayyan Stadium for the 2022 FIFA World Cup, where I was lead coordinator of the masterplan. I bring over nine years of experience on complex projects, blending technical rigour with a commitment to design quality. Skilled in BIM, streamlining workflows and interdisciplinary coordination, I am now looking to take on higher-level responsibilities along my development as an Architect.

SKILLS

Revit | Navisworks
Revizto | AutoCAD
Twinmotion | Enscape
Photoshop | InDesign
SketchUp Pro | NBS
Microsoft Office suite
Driving | CSCS License
British | Romanian

2018-present | Architectural Designer & BIM Lead

- Allford Hall Monaghan Morris | Award winning practice working on projects in Education, Healthcare, Housing, Arts and Offices | London, UK
>Tasks: Building Package & BIM lead for various commercial, residential and mixed used large schemes.
>Skills: In depth knowledge of high quality technical design solutions from a small to large scale area of the project; Multidisciplinary coordination using design workshops and BIM workflows; Broad experience in Revit, Revizto, Navisworks and real time rendering programs alongside Photoshop and Indesign; Developing specifications with NBS to achieve high sustainability ratings; Project planning.

2016-2018 | Architectural Assistant

- BDP Pattern | Division of BDP with focus on sports and masterplanning | London, UK
>Tasks: Design lead & coordinator of the Al Rayyan Stadium masterplan from Design Development to Construction phase | 2022 FIFA World Cup, Qatar
>Skills: Multi-discipline design coordination through workshops; Extensive knowledge with Revit to set an interdisciplinary BIM workflow and high quality outputs for technical or presentation purposes; Experience with tournament overlay, technical, urban and civil design; Stadium design.

2013-2014 | Architectural Volunteer

- Solar Decathlon Europe | International competition for solar powered houses | VIA University, Denmark
>Tasks: Designing a modular, fully sustainable house; Building architectural model.
>Skills: Hand and digital modeling experience; Implementation of sustainable and modular solutions.

2012-2013 | Architectural Technologist

- Bozel Living | Low energy building design office | Internship | Denmark
>Tasks: Outline, Scheme and Detail drawings, Client briefing, Cost calculation, BIM.
>Skills: In-depth experience of sustainable architecture, Revit, Project planning, Client interaction.

EDUCATION

2014-2016 | Master of Architecture (First Class) | MArch ARB - RIBA Part 2

- DeMontfort University | Leicester School of Architecture | Leicester, UK
>Tasks: Architectural design & research with concentrations in History and Philosophy, Sustainability (Ethics and Technology), Digital Computation & Fabrication, Housing and practice based research.
>Skills: In depth development of architectural design, fabrication and model making skills, Prominent use of research & critical abilities, focusing on architectural phenomenology.

2009-2013 | Bachelor of Architectural Technology & Construction Management

- VIA University College | Grade 12 (A) - Final diploma work | Horsens, Denmark
>Tasks: Architectural Building Design, Project Planning & Management, Building Services, BIM workflow.
>Skills: Managing a project from initial design to construction phase, Site management, Presentations skills, Working in teams and under a deadline, Comprehensive BIM and Revit knowledge, Developing specifications and sustainable solutions through buildability, cradle to cradle and energy analysis.
